

From the Desk of Director....

Dear students,

First of all I congratulate and welcome you all to be a member of Balaji family. Today's era is passing through the metamorphic phenomenal revolution in the field of academics. I believe that education brings drastic transformation in each individual human being, society and directs the whole nation into a right course, the cause of development of humanity.

I believe that parents send their wards with high expectations. They wish them to excel in studies and other extra-curricular activities to unfold and enhance their inner potentials and develop own conviction to face challenges of today's world. So education in real sense, is the process of unfolding and nurturing the talents and channeling the potentiality hidden in every child.

B.W.E.S. is committed to provide quality education and to create versatile personality of learners. Faridabad is blessed with fertile mind and body. What we need is to provide opportunity and environment. Balaji College of Pharmacy is started with the same objectives. We are blessed to start first pharmacy college In the vicinity and to create health leaders.

In spite of rapid advances made in medicine, still ill health is our uninvited and frequent visitor. Man continues to confront newer diseases and the fight against the infectious agents goes on. To end off the visitor there is an imperative need for us to use medicine. We know that quality medicines restore health quickly. For this quality to be gained-making of a quality pharmacy professional is equally important as that of medicine. Balaji College of Pharmacy is engaged in producing highly eminent pharmacy professionals.

Let us join hands to achieve the aim. Success is with those who work for it, as Thoreau says:

**"We must not only aim aright,
But draw the bow with all our might."**

With Best Wishes,

Jagdeesh Chaudhary
